Being established in 1983 in Samsun / Turkey, BAHADIR Medical Equipment has been recognized as a leader in the production of Surgical Instruments for its exceptional quality products, sales and wide range of service organization.

All instruments pictured in this catalog are the products of consistent craftsmanship combined with advanced production techniques and traditional skills acquired over the years. Forging to crafting-utmost care has been taken to ensure accuracy in every stage of production and our strive continues to achieve highest standards and top quality products. Instruments displayed here are stainless steel and they are shown in full scale unless otherwise indicated.

BAHADIR enjoys a significant reputation of manufacturing instruments for all surgical branches, thanks to close cooperation and support from our medical society which made them competitive international markets.

In addition to this catalog, we also have supplemental catalogues for ENT, Endoscopy and Steril Container System available on request. We are, however, conscious of the fact that this catalog remains insufficient to cover all the facilities and novelties we can offer. It is our endeavor to develop new products as new technology and demands for new procedures become known.

We will always be at your disposal with our technical facilities knowledge and vast experience for your specific needs including refurbishment of your instruments and sets, modification of present patterns, custom-made production on entirely new designs developed to your surgical techniques as well as any other product which is not displayed here.

BAHADIR would like to thank all those who have co-operated in the compilation of this catalog.
